Objective

I am passionate about exploring the intersection of software engineering and machine learning to build impactful solutions that solve real-world problems. With a strong background in programming and hands-on experience in developing applications, I am driven to continuously learn and grow in this rapidly evolving field. My goal is to contribute to innovative projects that challenge me while delivering value through technology and intelligent systems.

Education

American University of Beirut   *aug 2022 – dec 2024*
BS in Computer Science

- GPA: 3.2/4.0
- **Coursework:** Computer Architecture, software engineering, theory of computation , database structure , operating systems , networking , web development

Experience

IT department   *Lebanon, Hamra*
American university of Beirut   *June 2024 – Present*

Programming Teacher   *remotely*
Brightchamps   *January 2024 – May 2024*

Projects

Rating Movies Website:

- Developing a website similar to IMDb.

Interactive Bot:

- Creating a bot that replies like Souk Okaz involves designing an AI system using C language.

Booking Private Nurses Mobile Application:

- Developing a mobile application that allows users to book private nurses conveniently.
- Tools Used: flutter

Network File Transfer Server:

- Implementing protocols and algorithms for efficient and secure file transfer using the java language for development.

Red Cross Website:

- Creating a platform for managing volunteers, events, donations, and other organizational tasks.

WORKSHOPS AND CERTIFICATIONS

Coursera Certificates (Stanford University): Supervised Machine Learning: Regression and Classification– Advanced Learning Algorithms– Unsupervised Learning, Recommenders, Reinforcement Learning

Technologies

Languages: HTML, CSS, JavaScript, C++, C, Java, Node.js, Flutter, MySQL, Python , java springboot , react , mongo , firebase.
